

ABOUT

An independent multidisciplinary engineering consultancy providing **practical, innovative and sustainable** engineering solutions. We combine engineering science, industrial experience and modern technologies to improve **safety, productivity and long-term performance**.

CORE CAPABILITIES

01 Process Engineering

Process design, chemical development, process optimisation

02 Chemical Engineering

Thermodynamics, process control, heat transfer

03 Metallurgical Engineering

Mineral processing, hydrometallurgy, pyrometallurgy

04 Plant Engineering

Equipment selection, mechanical equipment, schedules

05 Process Financial Analysis

Concept studies, feasibility studies, technical due diligence

06 Digital Process Engineering

Engineering dashboards, data analytics, engineering information systems

07 Strategic Consulting

Senior management experience, practical implementation, independent advice

08 Operational Excellence

Process optimisation, debottlenecking, energy optimisation

INDUSTRIES SERVED

Mining

Mineral Processing

Chemical Processing

Metallurgical Processing

Industrial Manufacturing

Energy & Utilities

Water & Environmental Engineering

Critical Minerals

Rare Earth Processing

Hydrogen & Emerging Technologies

LOCATION

Gauteng, South Africa
Serving clients worldwide

PHONE

+27 82 796 3851
